

# AGV solution

## Introduction

AGV (Automated Guided Vehicle) equipped with electromagnetic or optical automatic guiding device, it's kind of wheeled mobile robot, driving prosuppose route, giving safety protection and supporting different transfer function.

## Advantages

Darveen AGV controller designed as modularization, expandable, simplicity operation, easy to maintain, high stable purpose. Providing different module to satisfied customer desired, Based on running environment customize as magnetic navigate AGV and Laser navigate AGV.

## Applications area

- Trailer AGV
- Unit-load AGV
- Forklift AGV
- Trackless AGV
